JUST A JOURNEY!**

Green Sport GS05

Available in: 14" to 20"

The Green Sport GS05 is Milestone's latest high-end summer tyre for passenger cars. The tyre delivers optimal performance in all driving styles. The special rubber composition and tyre structure have created a safe summer tyre that you can rely on in all weather conditions. Delivered with an excellent price-quality ratio.

- ✓ The sipe-in groove design is applied to the shoulder blocks, distributing movement evenly and improving driving comfort.
- ✓ The 3D design of a wide directional groove with chamfered edge will reduce irregular wear normally caused by traction and braking. This will keep the tyre quieter throughout its life.
- ✓ The tread design on the inner side of the tread features drainage grooves to improve water dispersal.

Green Sport

Available in: 10" to 20"

The Milestone Green Sport is the ideal tyre for passenger cars in the middle segment. Thanks to the unique tyre construction and rubber composition, the tyre feels solid yet comfortable. Thanks to the profile design with centrally positioned tread pattern, continuous longitudinal grooves and diagonally positioned wide grooves, the tyre has optimum grip, sporty driving properties and a comfortable feel. The Milestone Green Sport combines comfort and reliable driving characteristics.

- ✓ Robust tyre construction; optimum overall performance.
- ✓ Sporty tread design; optimum grip, reduced risk of aquaplaning.
- ✓ Continuous shoulder blocks; stable driving and braking.

Green Weight

Available in: 15" & 16"

The Milestone Green Weight was developed for transport and delivery vehicles. The heavier tyre structure, robust tread blocks and well thought-out tread design ensure optimum performance, even at maximum load. Water and dirt are discharged very effectively, resulting in maximum grip. The tyre's extra reinforced shoulders guarantee stable handling, even under heavy braking or unexpected evasive manoeuvres.

- ✓ Reinforced tyre structure; optimal performance with heavy loads.
- ✓ Well thought-out tread design; effective drainage of water, reduced risk of aquaplaning.
- ✓ Extra reinforced shoulders; stable driving and braking.

Eco Stone

Available in: 10" to 14"

The Milestone Eco Stone has an increased load-bearing capacity thanks to its robust tyre construction and improved rubber composition, and is therefore well able to withstand heavy loads in all conditions. The chequered tread design reduces the risk of aquaplaning, and the large shoulder tread blocks that extend to the side of the tyre make the Milestone Eco Stone very stable and keep the trailer well 'on track', even during unexpected swerve manoeuvres or heavy braking.

- ✓ Robust tyre structure; increased load capacity.
- ✓ Blocked tread design; reduced risk of aquaplaning.
- ✓ Wide, continuous shoulder blocks; increased stability.

Green 4Seasons

Available in: 13" to 18"

The Milestone Green 4Seasons is an all-season tyre of the latest generation. The tyre construction is modern and sturdy, but still feels very comfortable. The rubber composition in combination with the special all-season profile ensures excellent grip in all weather conditions. Water, snow and dirt are effectively disposed of, so that optimum grip is retained. Even on a dry road surface, the braking and driving characteristics are more than excellent. The Milestone Green 4Seasons has the 3PMSF certification and thus meets the European winter tyre regulations.

- ✓ Special rubber composition; excellent grip in all weather conditions.
- ✓ Unique all-season profile; effective water and snow evacuation.
- ✓ Wide, continuous shoulder blocks; increased stability, improved handling.
